

Bridgelux Decor Series LED Arrays

Product Data Sheet DS26

BXRA-W1800-xxxxH, BXRA-W3500-xxxxH

Introduction

The Bridgelux family of LED Array products delivers high performance, compact and cost-effective solid-state lighting solutions to serve the general lighting market. These products combine the higher efficacy, lifetime, and reliability benefits of LEDs with the light output levels of many conventional lighting sources.

The Bridgelux Decor Series delivers outstanding light quality with a very high Color Rendering Index (CRI), enabling lighting designers to truly render a full palette of colors over a wide range of light levels to create stunning and sophisticated lighting effects for retail, hospitality, museums and architectural lighting applications. With a typical Ra value of 97, an R9 value of 98 to enhance reds, and an R15 value of 98 to allow for realistic human skin representation, the Bridgelux Decor Series delivers the high quality light required for the most demanding lighting applications.

Features

- Typical Ra of 97 with R9 value of 98
- Compact high flux density light source
- Uniform high quality illumination
- Streamlined thermal path
- Energy Star / ANSI compliant color binning structure with 3 SDCM options
- Significantly more energy efficient than incandescent and halogen lamps
- Low voltage DC operation
- Instant light with unlimited dimming
- 5-Year warranty
- RoHS compliant and Pb free

Benefits

- High quality true color reproduction
- Enhanced optical control
- Clean white light without pixilation
- Significantly reduced thermal resistance and increased operating temperatures
- Smooth uniform consistent white light
- Lower operating costs
- Increased safety
- Easy to use with daylight and motion detectors to enable increased energy savings and light on demand
- Reduced maintenance costs
- Environmentally friendly, no disposal issue

Product Nomenclature

The part number designation for Bridgelux LED Arrays is explained as follows:

B X R A – A B C D E – R R R R S

Where:

B X R A – designates product family

A – designates color, W for Warm White

B C D – designates LED Array product flux

180 for a 1800 lumen array, 350 for a 3500 lumen array, etc.
(nominal values based on the equivalent 3000K CCT, 80 CRI products)

E – designates product family

R R R R S – used to designate product options:

| | | |
|-----------------------|-----------------------|----------------|
| BXRA - xxxxx - 00S0H: | CCT 2700 K, Ra 97 CRI | ANSI color bin |
| BXRA - xxxxx - 00X1H: | CCT 2700 K, Ra 97 CRI | 3SDCM |
| BXRA - xxxxx - 00Q0H: | CCT 3000 K, Ra 97 CRI | ANSI color bin |
| BXRA - xxxxx - 00X2H: | CCT 3000 K, Ra 97 CRI | 3SDCM |

S – designates Decor Series product option, typical CRI 97

The base product part number (BXRA-ABCDE) is indicated on each individual unit, printed on the bottom of the LED Array.

Average Lumen Maintenance Characteristics

Bridgelux projects that its family of LED Array products will deliver, on average, greater than 70% lumen maintenance after 50,000 hours of operation at the rated forward test current. This performance assumes constant current operation with case temperature maintained at or below 70°C. For use beyond these typical operating conditions please consult your Bridgelux sales representative for further assistance.

These projections are based on a combination of package test data, semiconductor chip reliability data, a fundamental understanding of package related degradation mechanisms, and performance observed from products installed in the field using Bridgelux die technology. Bridgelux conducts lumen maintenance tests per LM80. Observation of design limits is required in order to achieve this projected lumen maintenance.

Environmental Compliance

Bridgelux is committed to providing environmentally friendly products to the solid-state lighting market. Bridgelux LED Arrays are compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS directive. Bridgelux will not intentionally add the following restricted materials to LED Array products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

UL Recognition

Bridgelux secures UL Recognition for all the LED Array products. We continue to add arrays as they are recognized by UL. Please refer to the UL file E333389 for the latest list of UL Recognized Arrays. Bridgelux uses UL Recognized materials with suitable flammability ratings in the LED Array to streamline the process for customers to secure UL listing of the final luminaire product. Bridgelux recommends that luminaires are designed with a Class 2 Driver to facilitate the UL listing process.

Minor Product Change Policy

The rigorous qualification testing on products offered by Bridgelux provides performance assurance. Slight cosmetic changes that do not affect form, fit, or function may occur as Bridgelux continues product optimization.

Cautionary Statements

CAUTION: CONTACT WITH OPTICAL AREA

Do not touch the optical area of the LED Array. Avoid any contact with the optical area. Applying stress to the yellow phosphor resin area can result in damage to the LED Array.

Optics and reflectors must not be mounted in contact with the white phosphor resin area or the white ring that surrounds the yellow phosphor area. Using the white ring to secure optics can result in damage to the LED Array as the ring is not designed to act as a mechanical locating feature. Optical devices may be mounted on the top surface of the LED Array substrate outside of the white ring maximum OD as specified in the product data sheet. Use the mechanical features of the LED Array substrate edges and/or mounting holes to locate and secure the optical device as needed.

CAUTION: EYE SAFETY

Eye safety classification for the use of Bridgelux LED Arrays is in accordance with IEC specification EN62471: Photobiological Safety of Lamps and Lamp Systems. Bridgelux LED Arrays are classified as Risk Group 1 (Low Risk) when operated at or below their rated test current. Please use appropriate precautions. It is important that employees working with LEDs are trained to use them safely.

CAUTION: RISK OF BURN

Do not touch the LED Array or resin area during operation. Allow the LED Array to cool for a sufficient period of time before handling. The LED Array may reach elevated temperatures such that it can burn skin when touched.

CAUTION: CHEMICAL EXPOSURE HAZARD

Exposure to some chemicals commonly used in luminaire manufacturing and assembly can cause damage to the LED Array. Please consult Application Note AN11 for additional information.

Case Temperature Measurement Point

A case temperature measurement point location is included on the top surface of the Bridgelux LED Arrays. The location of this measurement point is indicated in the mechanical dimensions section of this data sheet.

The purpose of this measurement point is to allow the user access to a measurement point closely linked to the true case temperature on the back surface of the LED Array. Once the LED Array is installed, it is challenging to measure the back surface of the array, or true case temperature. Measuring the top surface of the product can lead to inaccurate results due to the poor thermal conductivity of the top layers of the array such as the solder mask and other materials.

Bridgelux has provided the case temperature measurement location in a manner which closely ties it to the true case temperature of the LED Array under steady state operation. Deviations between thermal measurements taken at the point indicated and the back of the LED Array differ by less than 1 °C, providing a robust method to testing thermal operation once the product is installed.

Quick Selection Guide

The following configurations are available:

Table 1: Selection Guide for Bridgelux Décor Arrays

| Part Number | Array Series | CCT (Nominal) | CRI (typ) | Typ Pulsed Flux T_j 25°C (lm) | Typ DC Flux T_{case} 70°C (lm) | Test Current (mA) | Vf (Typ) (V) | Power (Typ) (W) | Efficacy (Typ at T_j 25°C) (lm/W) |
|------------------|--------------|------------------|--------------|---------------------------------------|--|----------------------|--------------------|-----------------------|--|
| BXRA-W1800-00S0H | ES | 2700K | 97 | 1300 | 1130 | 700 | 37.5 | 26 | 50 |

Typical Color Rendering Index Values

The high CRI light delivered by the Bridgelux Decor Series Array products truly reproduces colors compared with natural light. Table 2 below lists the typical Ra and individual R1 through R16 values of the Bridgelux Decor Series Array products.

Table 2: Ra and R values for Bridgelux Decor Series LED Arrays

| Ra | R1 | R2 | R3 | R4 | R5 | R6 | R7 | R8 | R9 | R10 | R11 | R12 | R13 | R14 | R15 | R16 |
|----|----|-----|----|----|----|----|----|----|----|-----|-----|-----|-----|-----|-----|-----|
| 97 | 97 | 100 | 96 | 96 | 98 | 98 | 99 | 98 | 98 | 99 | 92 | 87 | 98 | 97 | 98 | 96 |

Flux Characteristics

Table 3: Flux Characteristics

| ANSI CCT (K) | Part Number | Array Series | CRI (typ) | Typical DC Flux $T_{\text{case}}=70^{\circ}\text{C}$ (lm) ⁽³⁾ | Minimum Pulsed Flux $T_j = 25^{\circ}\text{C}$ (lm) ⁽¹⁾ | Typical Pulsed Flux $T_j = 25^{\circ}\text{C}$ (lm) | Test Current (mA) ⁽²⁾ |
|--------------|------------------|--------------|-----------|--|--|---|----------------------------------|
| 2700K | BXRA-W1800-00S0H | ES | 97 | 1130 | 1170 | 1300 | 700 |
| | BXRA-W1800-00X1H | | | | | | |
| | BXRA-W3500-00S0H | RS | 97 | 2260 | 2340 | 2600 | 2100 |
| | BXRA-W3500-00X1H | | | | | | |
| 3000K | BXRA-W1800-00Q0H | ES | 97 | 1220 | 1260 | 1400 | 700 |
| | BXRA-W1800-00X2H | | | | | | |
| | BXRA-W3500-00Q0H | RS | 97 | 2440 | 2520 | 2800 | 2100 |
| | BXRA-W3500-00X2H | | | | | | |

Notes for Table 3:

1. Bridgelux maintains a $\pm 7\%$ tolerance of flux measurements.
2. Parts are tested in pulsed conditions, $T_j = 25^{\circ}\text{C}$. Pulse width is 10 ms at rated test current.
3. Typical performance when driven at DC (direct current) test current with LED Array case temperature maintained at 70°C , mounted to heat sink with thermal interface material. Please contact a Bridgelux sales representative for additional details.
4. Reference Table 8 for typical performance at other driver currents (including those commonly available in the market).

Optical Characteristics

Table 4: Optical Characteristics

| ANSI CCT (K) | Part Number | Array Series | Color Temperature (CCT) ^{[1], [2], [3]} | | | CRI (typ) ^[6] | Typical Viewing Angle (Degrees) $2\theta^{1/2}$ ^[4] | Typical Center Beam Candle Power (cd) ^[5] |
|--------------|------------------|--------------|--|--------|--------|--------------------------|--|--|
| | | | Min | Typ | Max | | | |
| 2700K | BXRA-W1800-00S0H | ES | 2580 K | 2725 K | 2870 K | 97 | 120 | 410 |
| | BXRA-W1800-00X1H | | - | 2725 K | - | 97 | 120 | 410 |
| | BXRA-W3500-00S0H | RS | 2580 K | 2725 K | 2870 K | 97 | 120 | 830 |
| | BXRA-W3500-00X1H | | - | 2725 K | - | 97 | 120 | 830 |
| 3000K | BXRA-W1800-00Q0H | ES | 2870 K | 3045 K | 3220 K | 97 | 120 | 450 |
| | BXRA-W1800-00X2H | | - | 3045 K | - | 97 | 120 | 450 |
| | BXRA-W3500-00Q0H | RS | 2870 K | 3045 K | 3220 K | 97 | 120 | 890 |
| | BXRA-W3500-00X2H | | - | 3045 K | - | 97 | 120 | 890 |

Notes for Table 4:

1. Parts are tested in pulsed conditions, $T_j = 25^\circ\text{C}$. Pulse width is 10 ms at rated test current.
2. Refer to Flux Characteristic Table for test current data.
3. Product is binned for color in x y coordinates.
4. Viewing angle is the off axis angle from the centerline where I_v is $\frac{1}{2}$ of the peak value.
5. Center beam candle power is a calculated value based on lambertian radiation pattern at nominal test current.
6. Typical CRI (Ra) value is 97, minimum value is 95.

Electrical Characteristics

Table 5: Electrical Characteristics

| ANSI CCT (K) | Part Number | Forward Voltage Vf (V) ^[2] | | | Test Current (mA) ^[1] | Typical Coefficient of Forward Voltage (mV/°C) $\Delta V_f / \Delta T_j$ | Typical Thermal Resistance Junction to Case (°C/W) $R_{\theta_{j-c}}$ |
|--------------|------------------|---------------------------------------|------|------|----------------------------------|--|---|
| | | Min | Typ | Max | | | |
| 2700K | BXRA-W1800-00S0H | 33.7 | 37.5 | 41.9 | 700 | -12 to -36 | 0.65 |
| | BXRA-W1800-00X1H | | | | | | |
| | BXRA-W3500-00SOH | 21.9 | 24.6 | 27.1 | 2100 | -8 to -24 | 0.31 |
| | BXRA-W3500-00X1H | | | | | | |
| 3000K | BXRA-W1800-00Q0H | 33.7 | 37.5 | 41.9 | 700 | -12 to -36 | 0.65 |
| | BXRA-W1800-00X2H | | | | | | |
| | BXRA-W3500-00Q0H | 21.9 | 24.6 | 27.1 | 2100 | -8 to -24 | 0.31 |
| | BXRA-W3500-00X2H | | | | | | |

Notes for Table 5:

1. Parts are tested in pulsed conditions, $T_j = 25^\circ\text{C}$. Pulse width is 10 ms at rated test current.
2. Bridgelux maintains a tester tolerance of ± 0.10 V on forward voltage measurements.

Absolute Minimum and Maximum Ratings

Table 6: Maximum Current and Reverse Voltage Ratings

| ANSI CCT (K) | Part Number | Array Series | Maximum DC Forward Current (mA) | Maximum Peak Pulsed Current (mA) ^[1] | Maximum Reverse Voltage (Vr) ^[2] |
|--------------|------------------|--------------|---------------------------------|---|---|
| 2700K | BXRA-W1800-00S0H | ES | 1000 | 1400 | -60 V |
| | BXRA-W1800-00X1H | | | | |
| | BXRA-W3500-00S0H | RS | 3000 | 4000 | -40 V |
| | BXRA-W3500-00X1H | | | | |
| 3000K | BXRA-W1800-00Q0H | ES | 1000 | 1400 | -60 V |
| | BXRA-W1800-00X2H | | | | |
| | BXRA-W3500-00Q0H | RS | 3000 | 4000 | -40 V |
| | BXRA-W3500-00X2H | | | | |

Notes for Table 6:

1. Bridgelux recommends a maximum duty cycle of 10% when operating LED Arrays at the maximum peak pulsed current specified.
2. Light emitting diodes are not designed to be driven in reverse voltage.

Table 7: Maximum Ratings

| Parameter | Maximum Rating |
|----------------------------|--|
| LED Junction Temperature | 150 °C |
| Storage Temperature | -40 °C to +105 °C |
| Operating Case Temperature | 105 °C |
| Soldering Temperature | 350 °C or lower for a maximum of 3.5 seconds |

Typical Performance at Alternative Drive Currents

The Bridgelux LED Arrays are tested and binned against the specifications shown in Tables 3, 4 and 5. Customers also have options to drive the LED Arrays at alternative drive currents dependent on the specific application. The typical performance at any drive current can be derived from the flux vs. current characteristics shown in Figures 6 and 7 and from the current vs. voltage characteristics shown in Figures 11 and 12. The typical performance at common drive currents is also summarized in Table 8.

Table 8: Typical Product Performance at Alternative Drive Currents

| ANSI CCT (K) | Part Number | Array Series | Typical DC Luminous Flux ϕ_v (lm), $T_{case}=70^{\circ}C$ | Typical Pulsed Luminous Flux ϕ_v (lm), $T_j=25^{\circ}C$ | Typical Forward Voltage V_f (V) | Forward Current (mA) ^[2] |
|--------------|--------------------------------------|--------------|--|---|-----------------------------------|-------------------------------------|
| 2700K | BXRA-W1800-00S0H BXRA-W1800-00X1H | ES | 640 | 710 | 35.5 | 350 |
| | | | 860 | 980 | 36.7 | 500 |
| | | | 1130 | 1300 | 37.5 | 700 ^[1] |
| 2700K | BXRA-W3500-00S0H BXRA-W3500-00X1H | RS | 1600 | 1800 | 23.7 | 1400 |
| | | | 1940 | 2200 | 24.1 | 1750 |
| | | | 2260 | 2600 | 24.6 | 2100 ^[1] |
| 3000K | BXRA-W1800-00Q0H BXRA-W1800-00X2H | ES | 675 | 750 | 35.5 | 350 |
| | | | 925 | 1050 | 36.7 | 500 |
| | | | 1220 | 1400 | 37.5 | 700 ^[1] |
| 3000K | BXRA-W3500-00Q0H BXRA-W3500-00X2H | RS | 1740 | 1950 | 23.7 | 1400 |
| | | | 2070 | 2350 | 24.1 | 1750 |
| | | | 2440 | 2800 | 24.6 | 2100 ^[1] |

Notes for Table 8:

1. Product is tested and binned at the specified drive current.
2. Operating these LED Arrays at or below the drive currents listed in Table 7, with a case temperature maintained at or below 70°C, will enable the average lumen maintenance projection outlined earlier in this Product Data Sheet.

Mechanical Dimensions

Figure 1: Drawing for part number BXRA-W1800-xxxxH

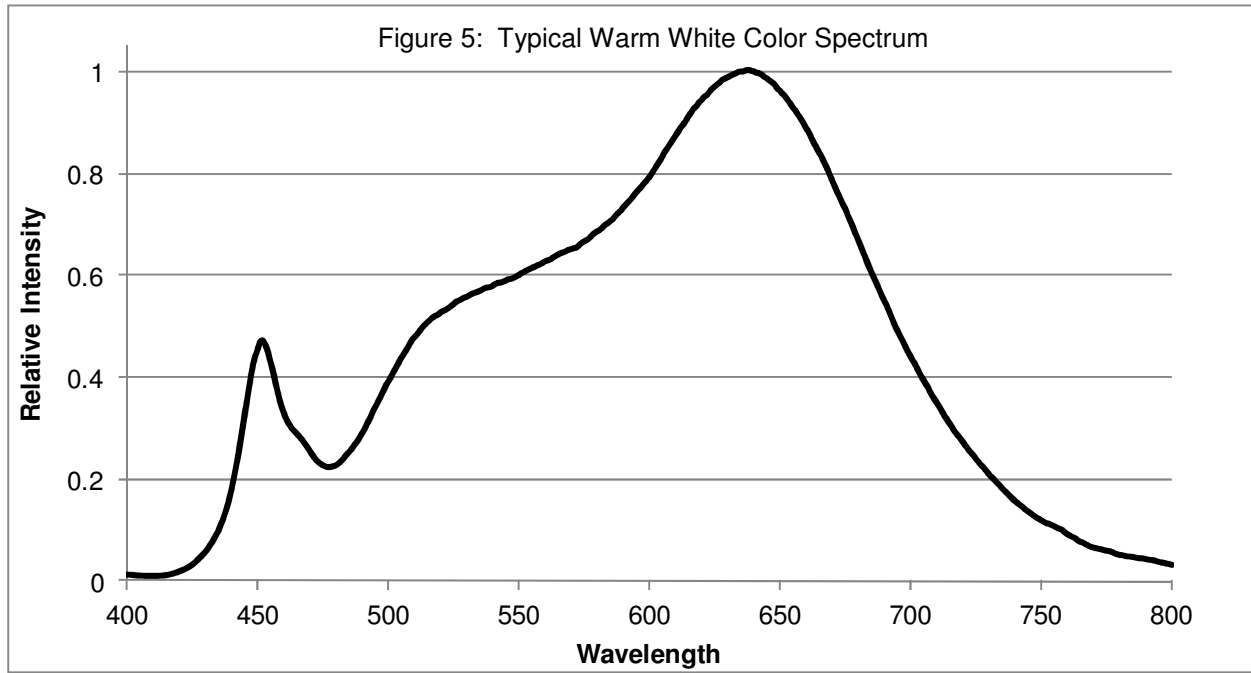

Notes for Figure 1:

1. Mounting holes are for M2.5 or #4 screws.
2. Solder pads are labeled "+" and "-" to denote positive and negative, respectively.
3. Drawings are not to scale.
4. Drawing dimensions are in millimeters.
5. Bridgelux recommends two tapped holes for mounting screws with 26.92 ± 0.10 mm center-to-center spacing.
6. Unless otherwise specified, tolerances are ± 0.10 mm.
7. Dimensions with parentheses "()" are for reference only.
8. Refer to product Application Notes AN10 and AN11 for product handling, mounting and heat sink recommendations.
9. The optical center of the LED Array is defined by the mechanical center of the array.
10. Bridgelux maintains a flatness of 0.1 mm across the mounting surface of the array.

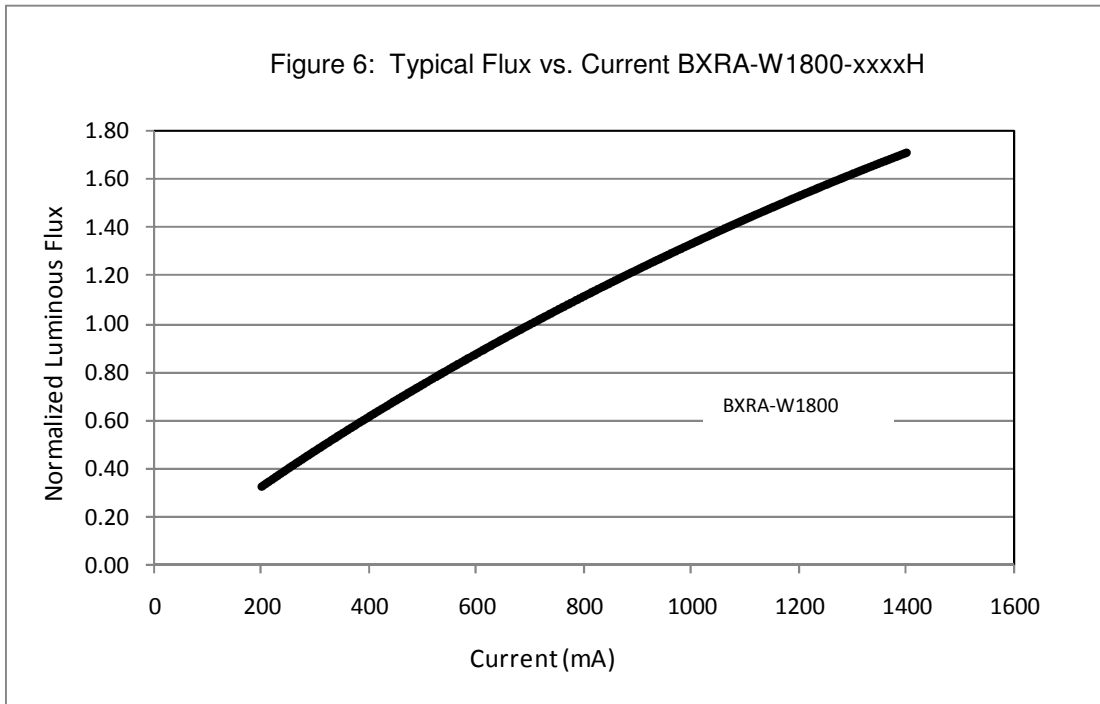

Typical Radiation Pattern

Wavelength Characteristics at Rated Test Current, $T_j=25^\circ\text{C}$

Typical Relative Luminous Flux vs. Current, T_j=25 °C

Typical Light Output Characteristics vs. Temperature

Typical Chromaticity Characteristics vs. Temperature

Typical Forward Current Characteristics

Product Binning

Typical manufacturing processes of semiconductor products result in a variation in performance surrounding the typical data sheet values. In order to minimize variation in the end product or application, Bridgelux bins its LED Arrays for color.

Bridgelux Décor LED Arrays are labeled using a 3-digit alphanumeric bin code. This bin code is printed on the back of each LED Array in the following format:

B C D

Where:

B C – designates color bin (P3, P4, Q3, etc.)

D – designates color rendering index (E, G, H, etc.)

All product packaged within a single tube are of the same color bin combination (or bin code). Using these codes it is possible to determine the best product utilization to deliver the consistency required in a given application.

Color Binning Information

Table 9: Warm White xy Bin Coordinates and Associated Typical CCT

| Bin Code | X | Y | ANSI CCT (K) |
|---------------|--------|--------|--------------|

Design Resources

Bridgelux has developed a comprehensive set of application notes and design resources to assist customers in successfully designing with Bridgelux LED Array products. Included below is a list of available resources which can be downloaded from the Bridgelux web site under the Design Resources section. These documents are updated regularly as new information becomes available, including complimentary infrastructure products such as commercially available secondary optics and electronic driver solutions.

Application Notes

- AN10: Effective Thermal Management of Bridgelux LED Arrays
- AN11: Assembly Considerations for Bridgelux LED Arrays
- AN12: Electrical Drive Considerations for Bridgelux LED Arrays
- AN14: Reliability Data Sheet for Bridgelux LED Arrays
- AN15: Reflow Soldering of Bridgelux LED Arrays
- AN16: Optical Considerations for Bridgelux LED Arrays

Optical Source Models

Optical source models and ray set files are available for all Bridgelux LED Array products, and can be downloaded directly from the Bridgelux web site. The list below contains the formats currently available. If you require a specific format not included in this list, please contact your Bridgelux sales representative for assistance.

- Zemax
- ASAP
- IESNA
- LightTools
- LucidShape
- OPTIS SPEOS
- PHOTOPIA
- TracePro
- Radiant Imaging Source Model

3D CAD Models

Three dimensional CAD models depicting the product outline of all Bridgelux LED Arrays are available in both SAT and STEP formats. These CAD files can be downloaded directly from the Bridgelux web site.

About Bridgelux

Bridgelux is a leading developer and manufacturer of technologies and solutions transforming the \$40 billion global lighting industry into a \$100 billion market opportunity. Based in Livermore, California, Bridgelux is a pioneer in solid-state lighting (SSL), expanding the market for light-emitting diode (LED) technologies by driving down the cost of LED lighting systems. Bridgelux's patented light source technology replaces traditional technologies (such as incandescent, halogen, fluorescent and high intensity discharge lighting) with integrated, solid-state lighting solutions that enable lamp and luminaire manufacturers to provide high performance and energy-efficient white light for the rapidly growing interior and exterior lighting markets, including street lights, commercial lighting and consumer applications. With more than 500 patent applications filed or granted worldwide, Bridgelux is the only vertically integrated LED manufacturer and developer of solid-state light sources that designs its solutions specifically for the lighting industry.
